

An Overview of Siam Investments Portfolio & Risk Exposure

Siam Investment Limited Board of Directors

Sunday, April 11, 2021

Background

SIAM, which stands for Single Aim, was started in 2006 by seven friends who later invited others to join the group. By the end of the year membership had increased to 17. The members agreed to contribute an initial investment of KES 100,000 to kick-start the group. Subsequently, the group was able to raise KES 2.1 Million(USD 21,000) as some members brought in more capital. Our membership is currently 75 and the group has converted to a public limited company to accommodate more numbers as required by the law.

MISSION: We are committed to actualize shareholders dream, transforming lives through innovative investments that deliver passive income.

VISION: Our vision is to deliver financial freedom to all our shareholders by 2027 and release generations from want.

In this report, we present an overview of the SIAM portfolio and the roadmap to financial freedom by 2027.

Purpose of the Report

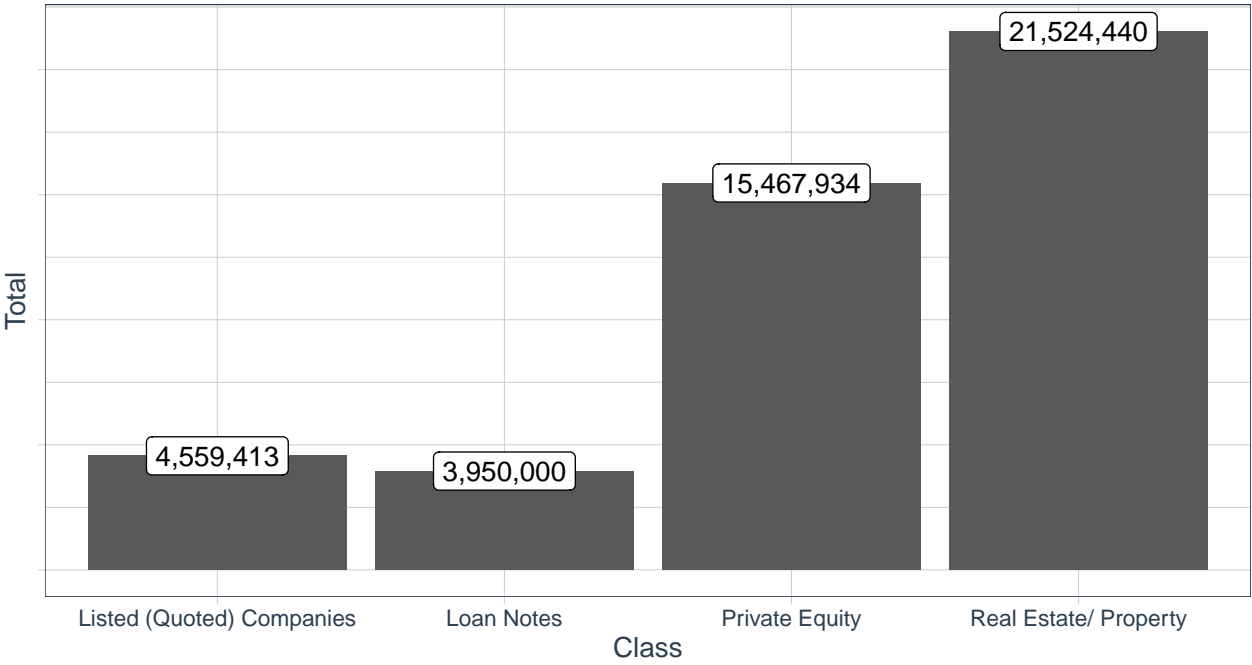

This 4 page report serves three purposes;

1. To give the shareholders of SIAM a snapshot of the investments held by the company. The directors note that the financial reports are not presented in a format that most members without a finance or accounting background can understand. Hence, this report serves to offer a simplified version of assets held by SIAM.
2. To evaluate the risk profile of investments held by SIAM and communicate them to the shareholders. Recently, the directors reported that parcels of land owned by SIAM and by individual members of SIAM had been repossessed by the government. While that was unfortunate, the assets present a fraction of assets owned by the company. This report serves to disclose the other assets and the risk associated with each asset. For ease of consumption, the directors have classified each asset into three risk categories; positive, uncertain, and negative. The classifications are clarified in the sections that follow.
3. To facilitate SIAM members to make informed decisions during the upcoming annual meeting.

Investment Classes

As the figure below shows SIAM has the bulk of the investment is in real estate (43%), private equity (33%), loan notes (14%) and 10% in Listed (Quoted) Companies. Note that SIAM has a total portfolio of 42001787 with a market value of 45501787. The breakdown of the investments by class is shown below. The listing of the entire portfolio is in the appendix.

SIAM INVESTMENTS LIMITED PORTFOLIO 2020
